When creating or joining a session, I will need to provide some personal preferences for myself regarding the potential restaurants that will be selected. I will be presented with three drop down menus that I can use to set my restaurant preferences. The three drop down menus are:

- Cuisine type (Italian, French, Chinese, etc.)
- Food type (Pizza, Sushi, Steak, etc.)
- Price range (Low, Medium, High)

Setting any of these preferences is entirely optional and I can skip this step. Regardless of what I choose, my profile will be updated to match.
